Work Experience

Senior Software Engineer

Kubicle / Dublin, Ireland

📅 January 2023 - Present

- Refactored external LMS integration code to improve maintainability by extracting and separating responsibilities to appropriate modules and introduce new LMS integrations to increase business feature value
- Improved DB query performance by factor of 100x for critical application endpoints which includes exam, project submissions. As a result, reduced timeout errors, and enhanced learner experience and productivity
- Continue to improve architecture scalability and performance
- Set development standard practices for the growing team

Skills Ruby on Rails React Ruby Heroku PostgreSQL CircleCI Delayed Job

Senior Software Engineer

Edge by Ascential / Dublin, Ireland

📅 July 2021 - July 2021

- Worked on the industry-leading ecommerce analytics SaaS platform mainly implementing and maintaining web API endpoints and also work on front-end as per the necessity of the team
- Drove the migration of the legacy search report to the newer data API based on JSON:API spec and React platform where the API endpoints are designed to return specific data for the UI to easily digest and render
- Senior role in code review, and fostering junior developers to write effective production quality code

Skills Ruby on Rails React JSON:API Specs Jest PostgreSQL MySQL RSpec Redis Snowflake
Looker BitBucket Codefresh

Software Developer

Longboat (acquired by Advarra. Inc) / Dublin, Ireland

📅 August 2020 - August 2020

- Took ownership of migrating existing functionality and features of the Clinical Trial Technology Platform to new platform based Ruby on Rails 6 for API and Vue.js for front-end
- Implement new features in an API first approach for the new platform
- Updated one of the core application (gateway) of the platform from Rails 4.2 to Rails 6.1 with Ruby 2.7.1

Skills Ruby on Rails Vue.JS 2 Jest MiniTest PostgreSQL Redis Pundit authorisation Sidekiq
Tailwind CSS Lodash Codeship

Software Developer

Lonely Planet / Dublin, Ireland

📅 March 2016 - March 2016

- Developed and maintained front-end and back-end of the multi-purpose Ruby on Rails CMS for Lonely

Planet's content ingestion, editing, and publishing of books in an agile team following best practices

- Maintained AWS infrastructure by utilizing IaC tools such as Chef and troubleshoot issues following an on-call rotation
- Mentored new team members to get them up-to-speed to work in CMS and multiple number of projects related to the CMS

Skills Ruby on Rails Ruby ES6 JavaScript Backbone.js PostgreSQL AWS Jenkins ChefDK
SASS/CSS Cucumber Rspec Jasmine Git/Github Docker Vault Packer Vagrant Logstash
PagerDuty Envato StackMaster
